

The Strength to Stop Bullets. The Flexibility to Meet Your Custom Specs.

BALLISTICBOARD™

Made with Duritium® Technology from ShotStop® Ballistics

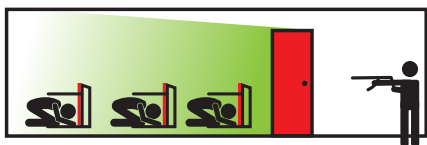

DURITIUM
TECHNOLOGY

BallisticBoard has flipped the world of custom ballistic materials on its head. Using its patented Duritium technology, BallisticBoard offers a variety of custom bulletproof* solutions ranging from 0.125" (1/8") thick rigid panels that effectively stop all handguns to a material that's under an inch thick, stops multiple rounds from armor piercing ammo, and weighs less than 6 lbs. per square foot.

BALLISTICBOARD® APPLICATIONS

Manufactured 100% in the United States by ShotStop Ballistics, BallisticBoard has the flexibility and capability to fulfill a custom bulletproof* solution to your specific product or circumstance

Classroom and office desks, doors and walls
