AirTEP – Search & Rescue Solutions

Designed for any aircraft, AirTEP is the simplest, the fastest and the safest way to insert or extract people by helicopter.

In SAR missions, this unique piece of equipment improves rescue capabilities of the operators in all emergency situations

FITTED FOR ANY MISSION

In any situation, AirTEP offers tactical advantage.

AirTEP is designed for any severe environment.

No pitching nor gyratory effect. The textile nets and the safety belts give the pax free movements and 360° vision while being secured.

Priority can be given to the rescue mission.

Fire fighting, Search and Rescue, Medevac, Mass Casualty Situation – for most missions, AirTEP provides you with new capabilities.

READY TO USE

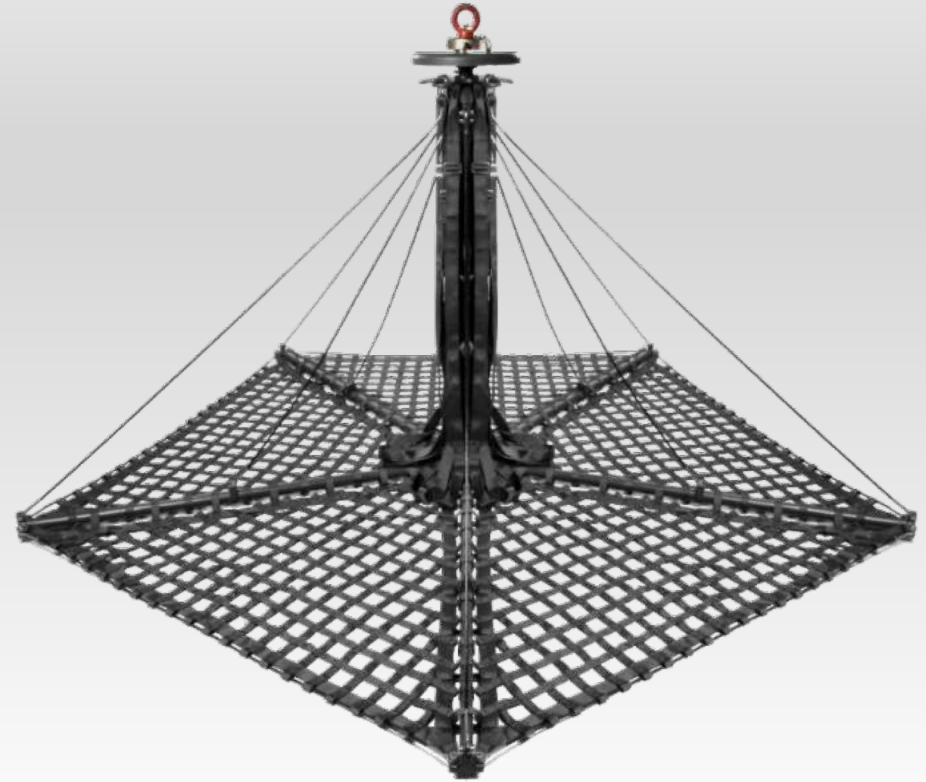

AirTEP and its accessories are adapted to any helicopter.

AirTEP is qualified and used in more than 20 countries, and implemented on many different aircraft:

SA330 Puma, AS332 Super Puma, EC725 Caracal, UH-60 Blackhawk, CH-47 Chinook, Bell 412, Bell 429, Bell 212, Mil MI-8/MI-17, S61 Sea King, AW-139, etc...

SPECIFICATIONS

External human cargo	10	pax
Weight	116	lbs
Rope length	82	ft
Maximum load	3300	lbs
Maximum indicated speed	100	kts
Temperature range	-30 ... +50	°C
Seawater and fire resistant		

QUICK AND SAFE

Dropping

Thanks to the braking device and the 82 feet rope, users keep control while dropping AirTEP onto the ground.

The dropping phase is less than 30 seconds.

Boarding

The safety belts are easy to fasten, be it for soldiers in full military gear, wounded people, civilian hostages, etc.

The boarding phase takes no longer than 1 minute.

Flying

Folded inside the aircraft, AirTEP has no effect on the approach flight.

The pentagon shape and the rope design provide stable flight, even at 100 kts.

MAINTENANCE AND SERVICES

- 15 year lifetime, or 3000 cycles
- Low maintenance and easy part replacement
- Full training range:
 - Technical training
 - Operational training
 - Maintenance training
- Customized services
